LOGAN ENERGY CORP. ANNOUNCES COMMISSIONING OF POUCE COUPE FACILITY AND CLOSING OF PREVIOUSLY ANNOUNCED FACILITY INTEREST SALE

Calgary, Alberta – May 30, 2025 – Logan Energy Corp. (TSXV: LGN) ("**Logan**") is pleased to announce completion of construction and commissioning of its 40 mmcf/d Pouce Coupe 04-19 gas plant, compressor station and oil battery (the "**Pouce Coupe Facility**") as well as associated gas gathering and sales pipelines in the area. In connection with commissioning, the Company today closed the previously announced sale of a 35% non-operated working interest in the Pouce Coupe Facility to Topaz Energy Corp. for cash proceeds of $26.0 million (the "**Facility Interest Sale**"). Proceeds have been used to reduce bank indebtedness. For further details on the Facility Interest Sale, refer to Logan's press release dated February 3, 2025.

Commissioning of the Pouce Coupe infrastructure is an important milestone for the Company, positioning Logan for a material step-change in growth of its Pouce Coupe property from current production of approximately 3,500 BOE/d[1] to a forecast average of over 8,000 BOE/d in the second half of 2025, with 9 (9.0 net) wells to be placed onstream this summer.

ABOUT LOGAN ENERGY CORP.

Logan is a growth-oriented exploration, development and production company formed through the spin-out of the early stage Montney assets of Spartan Delta Corp. Logan was founded with a strong initial capitalization and three high quality and opportunity rich Montney assets located in the Simonette and Pouce Coupe areas of northwest Alberta and the Flatrock area of northeastern British Columbia and has recently established a position within the greater Kaybob Duvernay oil play with assets in the North Simonette, Ante Creek and Two Creeks areas. The management team brings proven leadership and a track record of generating excess returns in various business cycles.

Other Measurements

All dollar figures included herein are presented in Canadian dollars, unless otherwise noted. This press release contains various references to the abbreviation "BOE" which means barrels of oil equivalent. Where amounts are expressed on a BOE basis, natural gas volumes have been converted to oil equivalence at six thousand cubic feet (mcf) per barrel (bbl). The term BOE may be misleading, particularly if used in isolation. A BOE conversion ratio of six thousand cubic feet per barrel is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead and is significantly different than the value ratio based on the current price of crude oil and natural gas. This conversion factor is an industry accepted norm and is not based on either energy content or current prices. Such abbreviation may be misleading, particularly if used in isolation.

[1] Average production for the three months ended March 31, 2025

Forward-Looking and Cautionary Statements

Certain statements contained within this press release constitute forward-looking statements within the meaning of applicable Canadian securities legislation. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "anticipate", "budget", "plan", "endeavor", "continue", "estimate", "evaluate", "expect", "forecast", "monitor", "may", "will", "can", "able", "potential", "target", "intend", "consider", "focus", "identify", "use", "utilize", "manage", "maintain", "remain", "result", "cultivate", "could", "should", "believe" and similar expressions (or grammatical variations or negatives thereof). Logan believes that the expectations reflected in such forward-looking statements are reasonable as of the date hereof, but no assurance can be given that such expectations will prove to be correct and such forward-looking statements should not be unduly relied upon. Without limitation, this press release contains forward-looking statements pertaining to: the business plan, objectives and strategy of Logan, including its growth strategy; Logan's drilling plans and anticipated production levels; and management's track record of generating excess returns in various business cycles.

The forward-looking statements and information are based on certain key expectations and assumptions made in respect of Logan including expectations and assumptions concerning: the business plan of Logan; the timing of and success of future drilling; development and completion activities and infrastructure projects; the performance of existing wells; the performance of new wells; the availability and performance of facilities and pipelines; the geological characteristics of Logan's properties; the successful integration of the acquired assets into Logan's operations; the successful application of drilling, completion and seismic technology; prevailing weather conditions; prevailing legislation affecting the oil and gas industry; prevailing commodity prices, price volatility, price differentials and the actual prices received for Logan's products; impact of inflation on costs; royalty regimes and exchange rates; the application of regulatory and licensing requirements; the availability of capital under the Company's credit facilities, labour and services; the creditworthiness of industry partners; and the ability to source and complete acquisitions.

Although Logan believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information because Logan can give no assurance that they will prove to be correct. By its nature, such forward-looking information is subject to various risks and uncertainties, which could cause the actual results and expectations to differ materially from the anticipated results or expectations expressed. These risks and uncertainties include, but are not limited to, fluctuations in commodity prices (including pursuant to determinations by the Organization of Petroleum Exporting Countries and other countries (collectively referred to as OPEC+) regarding production levels) and the risk of an extended period of low oil and natural gas prices; changes in industry regulations and legislation (including, but not limited to, tax laws, royalties, and environmental regulations); the imposition or expansion of tariffs imposed by domestic and foreign governments or the imposition of other restrictive trade measures, retaliatory or countermeasures implemented by such governments, including the introduction of regulatory barriers to trade and the potential material adverse effect on the Canadian, U.S. and global economies, and by extension the Canadian oil and natural gas industry and the demand and/or market price for the Company's products and/or otherwise adversely affects the Company; changes in the political landscape both domestically and abroad, wars (including ongoing military actions in the Middle East and between Russia and Ukraine), hostilities, civil insurrections, foreign exchange or interest rates, increased operating and capital costs due to inflationary pressures (actual and anticipated), risks associated with the oil and gas industry in general, stock market and financial system volatility, impacts of pandemics, the retention of key management and employees, risks with respect to unplanned third-party pipeline outages and risks relating to inclement and severe weather events and natural disasters, such as fire, drought and flooding, including in respect of safety, asset integrity and shutting-in production. The foregoing list is not exhaustive. Please refer to Management's Discussion and Analysis of the Company dated May 14, 2025 and the Company's Annual Information Form dated March 19, 2025 for discussion of additional risk factors relating to Logan, which can be accessed on its SEDAR+ profile at www.sedarplus.ca. Readers are cautioned not to place undue reliance on this forward-looking information, which is given as of the date hereof, and to not use such forward-looking information for anything other than its intended purpose. Logan undertakes no

obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by law.

This press release contains future-oriented financial information and financial outlook information (collectively, "**FOFI**") about Logan averaging asset level production in Pouce Coupe of over 8,000 BOE/d in the second half of 2025 which are subject to the same assumptions, risk factors, limitations, and qualifications as set forth in the above paragraphs. FOFI contained in this document was approved by management as of the date of this document and was provided for the purpose of providing further information about Logan's proposed business activities in 2025. Logan and its management believe that FOFI has been prepared on a reasonable basis, reflecting management's best estimates and judgments, and represent, to the best of management's knowledge and opinion, the Company's expected course of action. However, because this information is highly subjective, it should not be relied on as necessarily indicative of future results. Logan disclaims any intention or obligation to update or revise any FOFI contained in this document, whether as a result of new information, future events or otherwise, unless required pursuant to applicable law. Readers are cautioned that the FOFI contained in this document should not be used for purposes other than for which it is disclosed herein. Changes in forecast commodity prices, exchange rates, differences in the timing of capital expenditures, and variances in average production estimates can have a significant impact on the Logan's key performance measures. The Company's actual results may differ materially from these estimates.
